SURIA
DIRGAHAYU

Meaning:

- The SD monogram is designed as one unified structure, symbolizing connected engineering solutions, teamwork, and seamless execution across projects.
- The sharp angular cuts represent precision, technical expertise, and industrial craftsmanship. It gives the identity a strong engineering personality.
- The central vertical elements resemble structural pillars, steel beams, or architectural supports. This subtly connects the brand to infrastructure, fabrication, and construction.
- The curved outer D creates a protective framework around the logo, representing stability, reliability, and long term strength.
- The forward leaning S shape creates movement and momentum, symbolizing growth, innovation, and progress.
